# STAGING A CLINICAL PERFORMANCE

Training PSU Faculty  
Standardized Patient  
Educators and  
Developing a  
Training Program  
PSU Students to be  
Standardized Patient

**Impact learning opportunities for students in all programs**

...Allied Health Science students gain practical experience  
...high fidelity clinical situations  
...students' ability to respond, critically think, and make sound  
...decisions.  
...and for standardized and simulated patients affords  
...g students opportunity to practice and get appraisal of  
...ormance and improvisational techniques, exercise some  
...n creating their character and acting out a variety of  
.../social challenges, and gain specialty certification that  
...y doors for their future careers.  
...inary Faculty/Staff Alignment leveraging strengths in  
...vice, Scholarship/Research  
...e community through improved patient/client  
...ent and care in the allied health professions  
...the community with certified standardized/simulated  
...or several settings (film, plays, hospitals, academic centers)  
...p opportunities investigating what impact the use of  
...andardized/simulated patient encounters has on clinical  
...on, practice and outcomes  
...ost professional development opportunities for other  
...ons interested in training standardized patients  
...andardized and simulated patient encounters as a  
...al tool to train and assess students' abilities in a replicated  
...vironment to enhance clinical readiness.

Created by the  
**Doctor of Physical Therapy Program,**  
working collaboratively with the  
**Nursing and Counselor Ed/Psych Programs**  
(HHE Cluster)  
and **Music, Theatre and Dance Programs**  
(A&T Cluster)

**Student Alignment**

- Provide MTD & Allied Health Science students with active experiential learning opportunities through service and ap
- Standardized Patient Certification Program integrated into MTD curriculum

**Self-Reinforcing & Sustainability – develop skills, knowledge experiences to be reapplied in future activities**

- Students broaden their acting portfolios to market themselves broadly in the professional world
- Ongoing use of Standardized Patients in Allied Health prog assessment and learning activities to address emerging so
- Professional development opportunities to a growing netw partners who use Standardized Patients to augment health education and training

**Project Scalability & Sustainability**

- Project Plans include 3 Phases:
  - **Phase I:** 16 PSU Faculty to receive a certificate as St Patient Educators. Pilot the use of Standardized Pat Counselor Ed training program and as part of the O DPT program
  - **Phase II:** Hire students from MTD to act as the pati medical, interdisciplinary virtual cases. Allied Health students will utilize the virtual case in semester lon solve complex medical problems using the principle interprofessional education and practice
  - **Phase III:** Cross discipline, cross cluster, community involving the development and implementation of casualty scenario for public health emergency plan response training
